

KEN-HyFi Hub and Ecosystem Apps

Simple User Manual for New Visitors

Version	1.0
Prepared for	Kohenoor Technologies
Primary Hub	https://kenhyfi.kohenoor.tech
Purpose	Easy user guidance for exploring KEN-HyFi Hub and ecosystem apps

Important: The KEN Ecosystem is actively evolving. Some apps may be in Alpha, Beta, internal testing, or staged release. Users should rely on official links and contact support before taking financial, settlement, or investment-related action.

12. Final User Note

1. Welcome to KEN-HyFi Hub

KEN-HyFi Hub is the main gateway to the Kohenoor Technologies ecosystem. From one place, users can explore financial technology, AI tools, education platforms, trading intelligence, digital settlement services, and ecosystem utilities.

The Hub is designed for:

- Individuals who want to explore the KEN ecosystem
- Businesses that need compliant digital settlement tools
- Traders and investors looking for AI-assisted financial intelligence
- Students and professionals interested in AI, blockchain, Web3, and finance
- Developers who want AI-supported smart contract and prompt-generation tools

KEN-HyFi Hub helps users understand what each ecosystem app does and where to go next.

2. What is the KEN Ecosystem?

The KEN Ecosystem is a group of connected platforms developed by Kohenoor Technologies. These platforms work together to support Hybrid Finance, Artificial Intelligence, Education 3.0, Web3, commerce, and digital asset utilities.

2.1 KAI: The Intelligence Engine

KAI stands for Kohenoor Artificial Intelligence. It works as the intelligence layer of the ecosystem.

KAI can help users with:

- Asking questions about finance, business, technology, and the ecosystem
- Understanding documents and reports
- Supporting advisory and decision-making workflows
- Helping with business intelligence
- Supporting compliance, audit, and settlement review
- Generating prompts, reports, and technical documents

In simple words, KAI is the AI assistant and intelligence brain behind the ecosystem.

2.2 KEN Token: The Ecosystem Utility Token

KEN is the native utility token of the Kohenoor ecosystem.

Network	Ethereum Mainnet
Token Standard	ERC-20
Contract Address	0x5f602133653237f362eb69826ba8237f4f7ab0c3

KEN may be used for ecosystem access, service discounts, platform utilities, membership benefits, and selected ecosystem transactions where supported. Users should always verify the correct contract address before interacting with KEN on any wallet or exchange.

3. What Can You Do on KEN-HyFi Hub?

- View all major ecosystem apps
- Understand the purpose of each app
- Open apps using official links
- Learn how KEN, KAI, KENFI, KENCOM, ProEdge, and other platforms are connected
- Access settlement, education, AI, trading, and developer tools
- Move from exploration to actual platform use

The Hub works like a central dashboard or directory for the ecosystem.

4. Quick Start Guide

Step 1: Open the Hub: Visit <https://kenhyfi.kohenoor.tech>. This is the main KEN-HyFi Hub link.

Step 2: Explore the App Cards: Each app card gives basic information about one ecosystem platform. Read the title, description, and available action buttons.

Step 3: Choose Your Purpose: Choose KAI for AI help, KENFI for financial intelligence, ProEdge for learning, KEN-HyFi for settlement, KENCOM for commerce, KEN-Miner for KEN utilities, and PowerKEN for investor information.

Step 4: Read Before Acting: Before making any financial transaction, settlement request, token swap, or investment-related decision, carefully read platform instructions and risk notices.

Step 5: Contact Support When Needed: Use official support channels if you are unsure.

5. Ecosystem Apps Explained in Simple Words

KEN-HyFi

Main Purpose	Hybrid Finance settlement and compliance platform
Best For	Businesses, institutions, serious users, settlement clients
Simple Explanation	The settlement control room of the ecosystem.

KEN-HyFi helps users manage digital asset settlement workflows with better transparency, documentation, and audit readiness.

Users may use this app for:

- Settlement instructions
- Digital asset transfer supervision
- Beneficiary onboarding
- Compliance-related workflows
- DASC issuance
- Transaction verification and records

KAI

Main Purpose	AI intelligence and business assistant
Best For	Users who need AI support, document review, advisory guidance, or research help
Simple Explanation	The AI brain of the ecosystem.

KAI helps users ask questions, analyze information, generate reports, and understand ecosystem services.

Users may use this app for:

- Business intelligence
- Financial questions
- Document analysis
- Ecosystem guidance
- Research support
- Compliance and audit understanding
- Report drafting

KENFI

Main Purpose	AI-powered financial intelligence and advisory
Best For	Traders, investors, fund managers, and financial users
Simple Explanation	The financial intelligence engine of the ecosystem.

KENFI is designed to help users understand portfolios, market behavior, risk, and investment strategies.

Users may use this app for:

- Portfolio analysis
- Risk understanding
- AI-supported advisory reports
- Market intelligence
- Shariah-conscious financial review where applicable
- Capital preservation-oriented analysis

KEN-Miner

Main Purpose	KEN ecosystem access for mining, staking, and related digital asset activity
Best For	Users exploring KEN utility, digital rewards, and ecosystem token activity
Simple Explanation	The platform for KEN-based activity and digital earning utilities.

KEN-Miner allows users to explore KEN-related digital participation tools.

Users may use this app for:

- KEN-related ecosystem participation
- Mining or staking-style utilities where available
- KENEX-related access
- Digital asset activity linked to the ecosystem

ProEdge

Main Purpose	Education 3.0 and professional training
Best For	Students, professionals, companies, institutions, and training clients
Simple Explanation	The learning and professional development arm of the ecosystem.

ProEdge provides practical training in modern skills.

Users may use this app for:

- Artificial Intelligence
- Blockchain
- Web3
- DeFi
- Business Intelligence

- Cybersecurity
- Financial technology

KENCOM

Main Purpose	Digital commerce and marketplace utility
Best For	Buyers, sellers, service providers, and business users
Simple Explanation	The marketplace and commerce layer of the ecosystem.

KENCOM supports commerce activity within the ecosystem.

Users may use this app for:

- Product or service listings
- Buyer and seller interaction
- Fiat and crypto-supported commerce where available
- Settlement-linked transaction records
- Business marketplace access

PowerKEN

Main Purpose	Investor portal and structured opportunity platform
Best For	Serious investors, strategic partners, and ecosystem growth participants
Simple Explanation	The investor-facing gateway of the ecosystem.

PowerKEN gives users access to investor-related information and opportunities.

Users may use this app for:

- Investor onboarding information
- Strategic ecosystem overview
- Growth and opportunity review
- Structured participation details

KEN Wallet

Main Purpose	Wallet and asset management utility
Best For	Users who want to manage KEN and other supported assets
Simple Explanation	The user's digital wallet for ecosystem activity.

KEN Wallet is intended to help users manage ecosystem-compatible assets.

Users may use this app for:

- Viewing assets
- Sending and receiving supported tokens
- Managing KEN
- Connecting with ecosystem services
- Reviewing transaction history where supported

Sentinel

Main Purpose	Security, risk, and preparedness intelligence
Best For	Users interested in risk monitoring, protection, and crisis awareness
Simple Explanation	The ecosystem's security and risk awareness platform.

Sentinel is designed for safety, risk awareness, and preparedness.

Users may use this app for:

- Risk alerts
- Geopolitical awareness
- Asset protection education
- Crisis planning
- Security guidance

DevCon

Main Purpose	AI-supported smart contract development
Best For	Developers, Web3 builders, blockchain learners, and technical users
Simple Explanation	The developer tool for Web3 and smart contract creation.

DevCon helps users generate or plan blockchain smart contracts with AI support.

Users may use this app for:

- Smart contract ideas
- Solidity code generation
- ERC-20 or Web3 contract planning
- Contract structure guidance
- Developer workflow support

PromptEX

Main Purpose	AI prompt generation
Best For	Users who work with ChatGPT, Claude, Cursor, Base44, Replit, GitHub Copilot, and other AI tools
Simple Explanation	The tool that helps users tell AI platforms exactly what they want.

PromptEX helps users create better prompts for coding, design, business, research, and automation.

Users may use this app for:

- Creating detailed AI prompts
- Preparing app-building instructions
- Generating coding prompts
- Improving AI output quality
- Saving time while working with AI platforms

PixilPro

Main Purpose	AI design and image utility
Best For	Creators, marketers, sellers, designers, and business users
Simple Explanation	The creative design tool of the ecosystem.

PixilPro helps users improve and edit images using AI-powered tools.

Users may use this app for:

- Image enhancement
- Background removal
- Product image improvement
- Design support
- Creative content generation

6. Which App Should I Open First?

User Need	Recommended App
I want to understand the ecosystem	KEN-HyFi Hub
I want AI help	KAI
I want financial advisory or portfolio intelligence	KENFI
I want digital settlement services	KEN-HyFi
I want education or training	ProEdge
I want to explore KEN utilities	KEN-Miner
I want to buy or sell products/services	KENCOM
I am an investor	PowerKEN
I want to manage ecosystem assets	KEN Wallet
I want risk and security guidance	Sentinel
I want to build smart contracts	DevCon
I want better AI prompts	PromptEX
I want image editing/design support	PixilPro

7. Basic User Journey

Beginner User

1. Visit KEN-HyFi Hub
2. Read the app descriptions
3. Open KAI and ask basic questions
4. Explore ProEdge for learning
5. Review KEN token information carefully

Business User

1. Visit KEN-HyFi Hub
2. Open KEN-HyFi
3. Review settlement process
4. Prepare KYC/KYB documents
5. Contact support for guided onboarding

Investor User

1. Visit KEN-HyFi Hub
2. Open PowerKEN
3. Review the ecosystem overview
4. Study KEN utility and token information
5. Contact the official team for further discussion

Trader or Financial User

1. Visit KEN-HyFi Hub
2. Open KENFI
3. Explore AI-powered financial intelligence
4. Review KENEX or KEN-Miner where available
5. Avoid making decisions without understanding risk

Developer User

1. Visit KEN-HyFi Hub
2. Open DevCon

3. Use PromptEX for better AI coding prompts
4. Generate smart contract or app development ideas
5. Review generated outputs carefully before deployment

8. Important Safety Guidelines

- Always use official links only
- Always verify the KEN contract address before adding or swapping the token
- Never share wallet private keys or seed phrases
- Do not trust random links shared by unknown people
- Read all instructions before making transactions
- Contact official support if confused
- Understand that digital assets carry risk
- Do not treat AI output as final financial, legal, or investment advice
- Use KAI and KENFI as decision-support tools, not as guaranteed prediction tools
- Keep screenshots and transaction records for important activity

9. KEN Token Basic Instructions

How to Add KEN to a Wallet

1. Open your Web3 wallet
2. Select Ethereum Mainnet
3. Choose Import Token or Add Custom Token
4. Paste the KEN contract address: 0x5f602133653237f362eb69826ba8237f4f7ab0c3
5. Confirm the token symbol as KEN
6. Add the token

Important Note: Only use the official contract address. Fake tokens may appear on public networks.

11. Simple Glossary

Term	Meaning
KEN	Utility token of the Kohenoor ecosystem.
KAI	Kohenoor Artificial Intelligence, the AI intelligence engine.
KEN-HyFi	Hybrid Finance settlement and compliance platform.
KENFI	AI-powered financial intelligence and advisory platform.
DASC	Digital Asset Settlement Certificate.
Web3 Wallet	A wallet used to hold and interact with blockchain assets.
ERC-20	A common token standard on Ethereum.
DeFi	Decentralized Finance.
Hybrid Finance	A system that connects traditional finance and blockchain-based finance.
KYC	Know Your Customer verification.
KYB	Know Your Business verification.
AML	Anti-Money Laundering checks.

12. Final User Note

The KEN Ecosystem is currently evolving through active development. Some apps may be in Alpha, Beta, internal testing, or staged release. Users should explore carefully, use official links, and contact the Kohenoor Technologies team for guided onboarding when using financial, settlement, or investment-related services.

KEN-HyFi Hub is the best starting point for understanding the full ecosystem.
